Sommaire

- Objectifs du projets
- Technologies utilisées
- Organisation
- Spécification du projet

Objectifs du projet

- Bibliothèque d'items personnalisée
- Recherches rapides et efficaces.
- Consultation et gestion d'items

Technologies utilisées

- Back : Node.js
- Front : React
- Front Mobile : React native
- Base de données : MongoDB
- API externe : Blizzard

Organisation

- Thibaut : API Blizzard, front web
- Julie : API Node.JS, front mobile

Spécification du projet

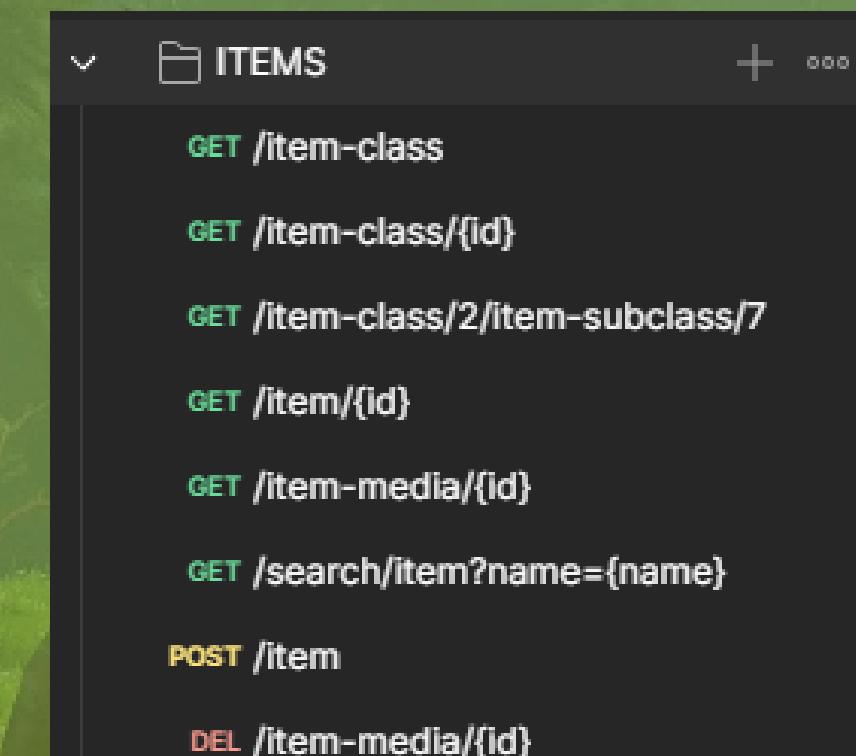

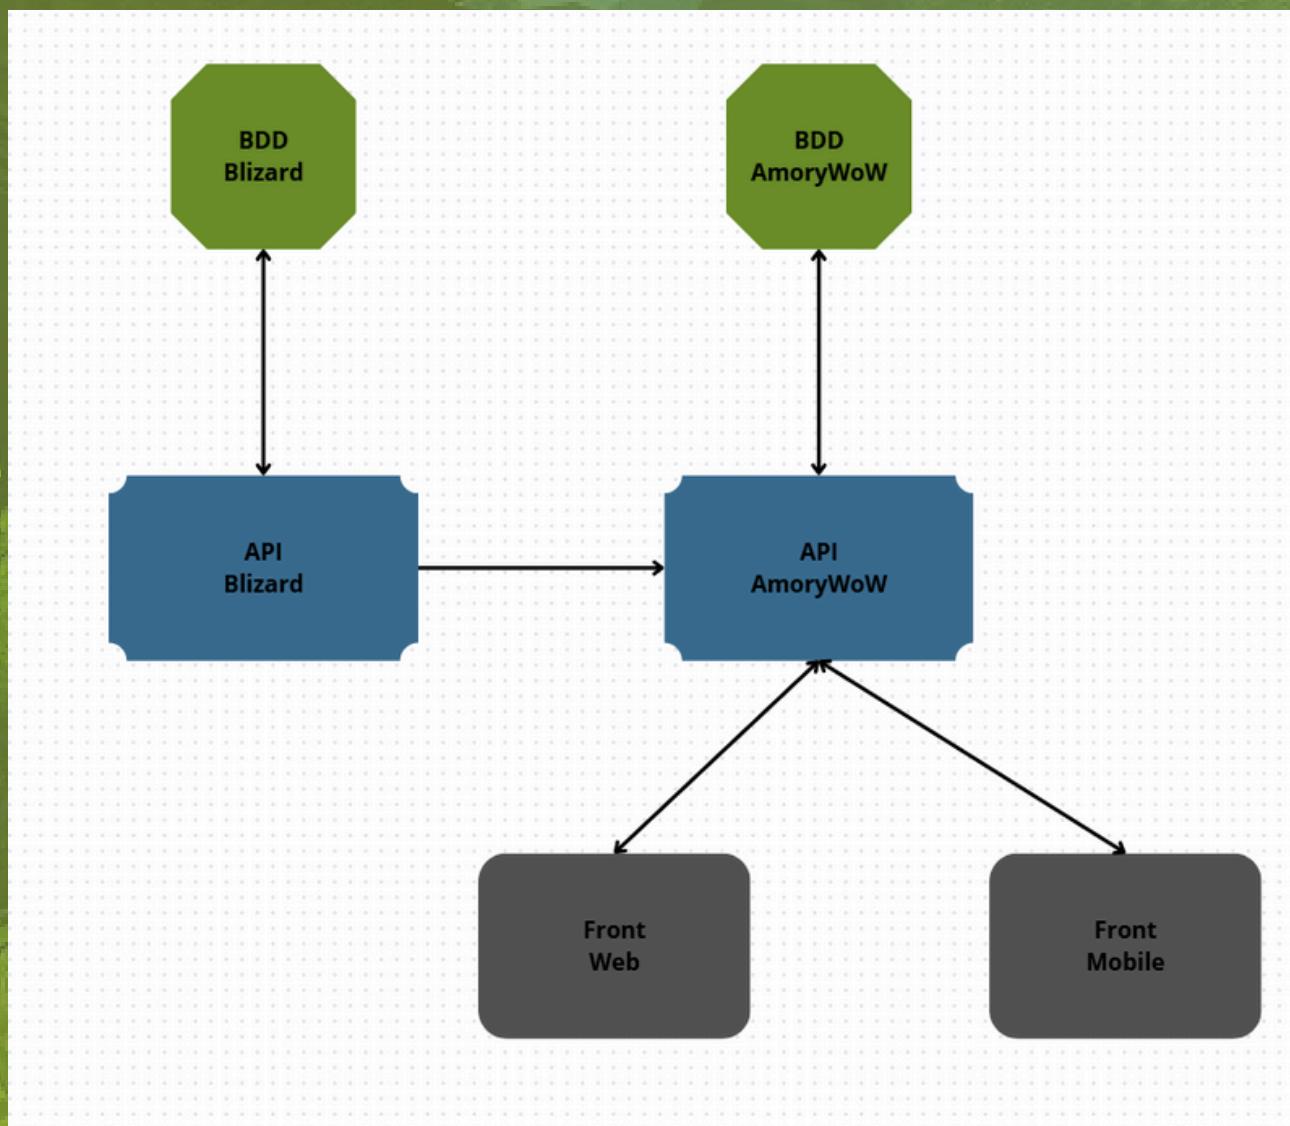

Base de donnée

```
_id: ObjectId('68650c319470413d359d4222')
id_user : "1181297770"
blizzardAccountName : "Sei#21172"
isAdmin : false
isBan : false
createdAt : 2025-07-02T10:38:41.513+00:00
__v : 0
```

```
_id: ObjectId('6863edfd52c038cb62a669dc')
itemId : 18609
id_user : "400905639"
createdAt : 2025-07-01T14:17:33.900+00:00
__v : 0
```

Spécification du projet

API

CREATURES

- GET /creature-family/index
- GET /creature-family/{id}
- GET /creature-type/index
- GET /creature-type/{id}
- GET /creature/{id}
- GET /search/creature?name={name}
- GET /creature-display-media/{id}
- GET /creature-family-media/{id}

CONNECT

- GET /auth/bnet
- GET /auth/bnet/callback
- GET /auth/status
- GET /auth/logout

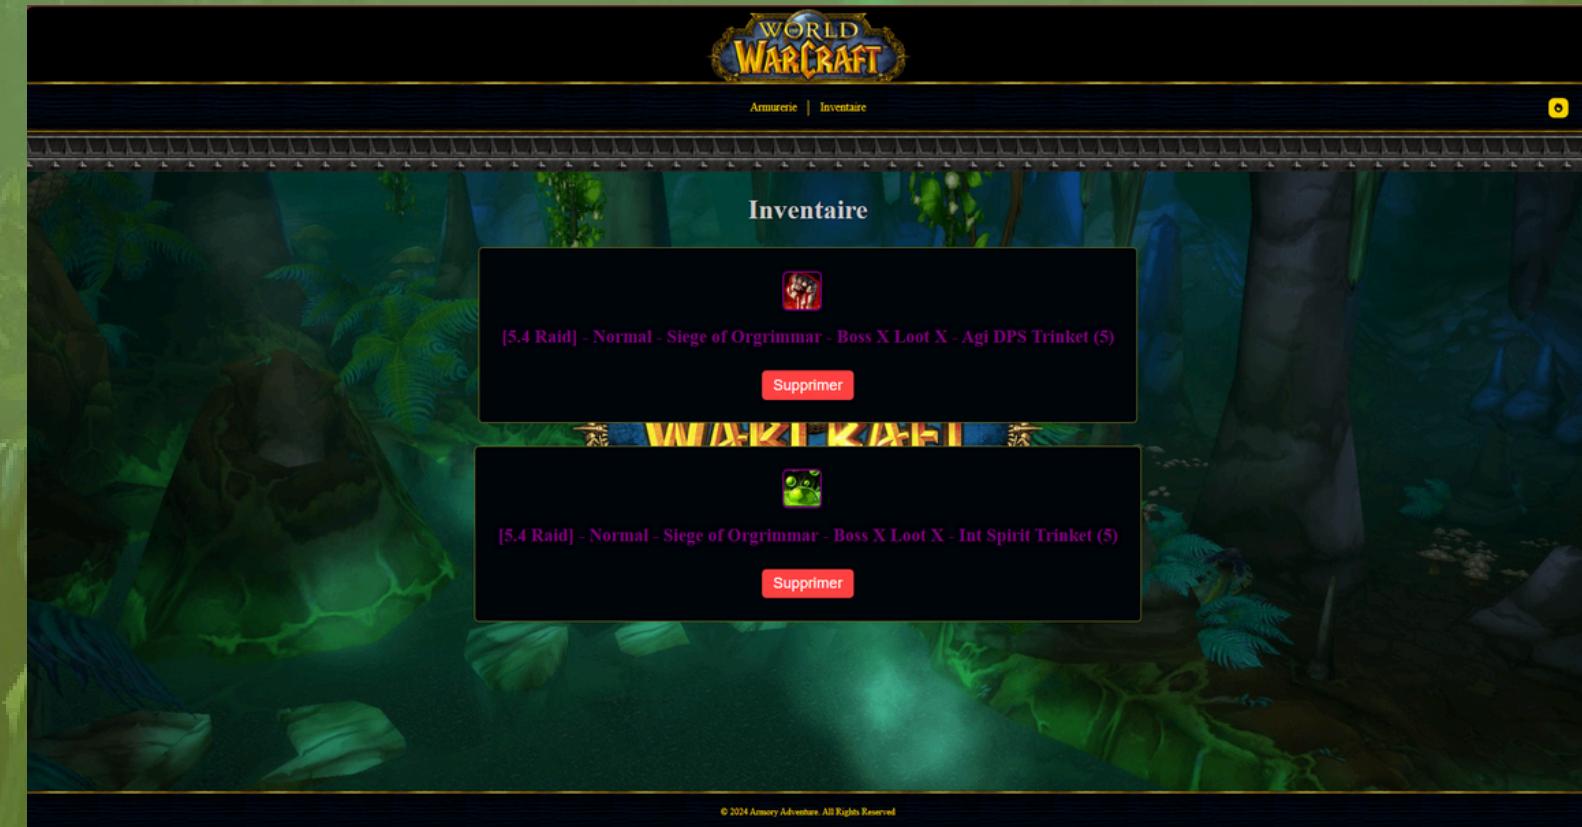

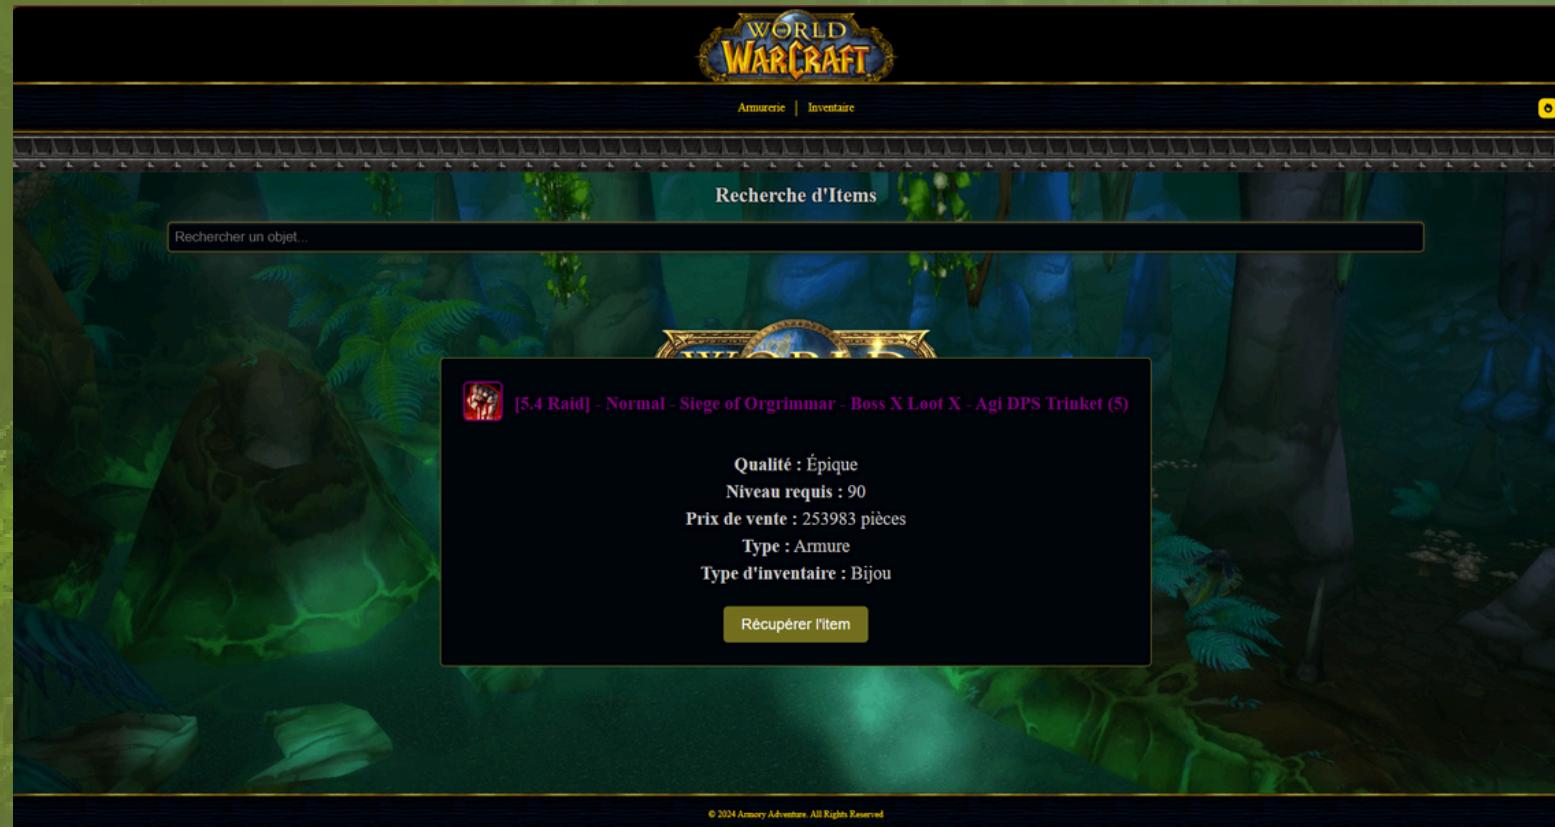

PROFILE

- GET /api-wow/account-profile

This screenshot displays three sections of the API specification: CREATURES, CONNECT, and PROFILE. The CREATURES section includes endpoints for creature families, types, and media. The CONNECT section contains authentication-related endpoints. The PROFILE section includes a single endpoint for account profile retrieval.
